TEACHERS LOVE IT!

I used this as a beginning of the year review of second grade math, in my third grade class. Great resource.

Kristine Bryan

I love that this challenges my students' thinking and is manipulative! This was great independent practice that goes above a worksheet!!!!

A Series of Crazy Classroom Events

My passion is making learning accessible to all students. I love scaffolding learning. Breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
