Cut & Paste MATH ACTIVITIES

Teacher Notes

The following worksheets contain **cut and paste** problems as well as **written answers**. Students are asked to **explain their thinking** for every **Numbers and Operations in Base-ten** standard. The cut and paste component gives students an opportunity to **check their work**. The explanation gives you an opportunity to **see their thinking**.

Most standards have **two pages**. The **pages for each standard** approach the content slightly differently. Use both or choose the one that **best fits** your students. If students **loose some of the pieces**, have students **write in** the answers.

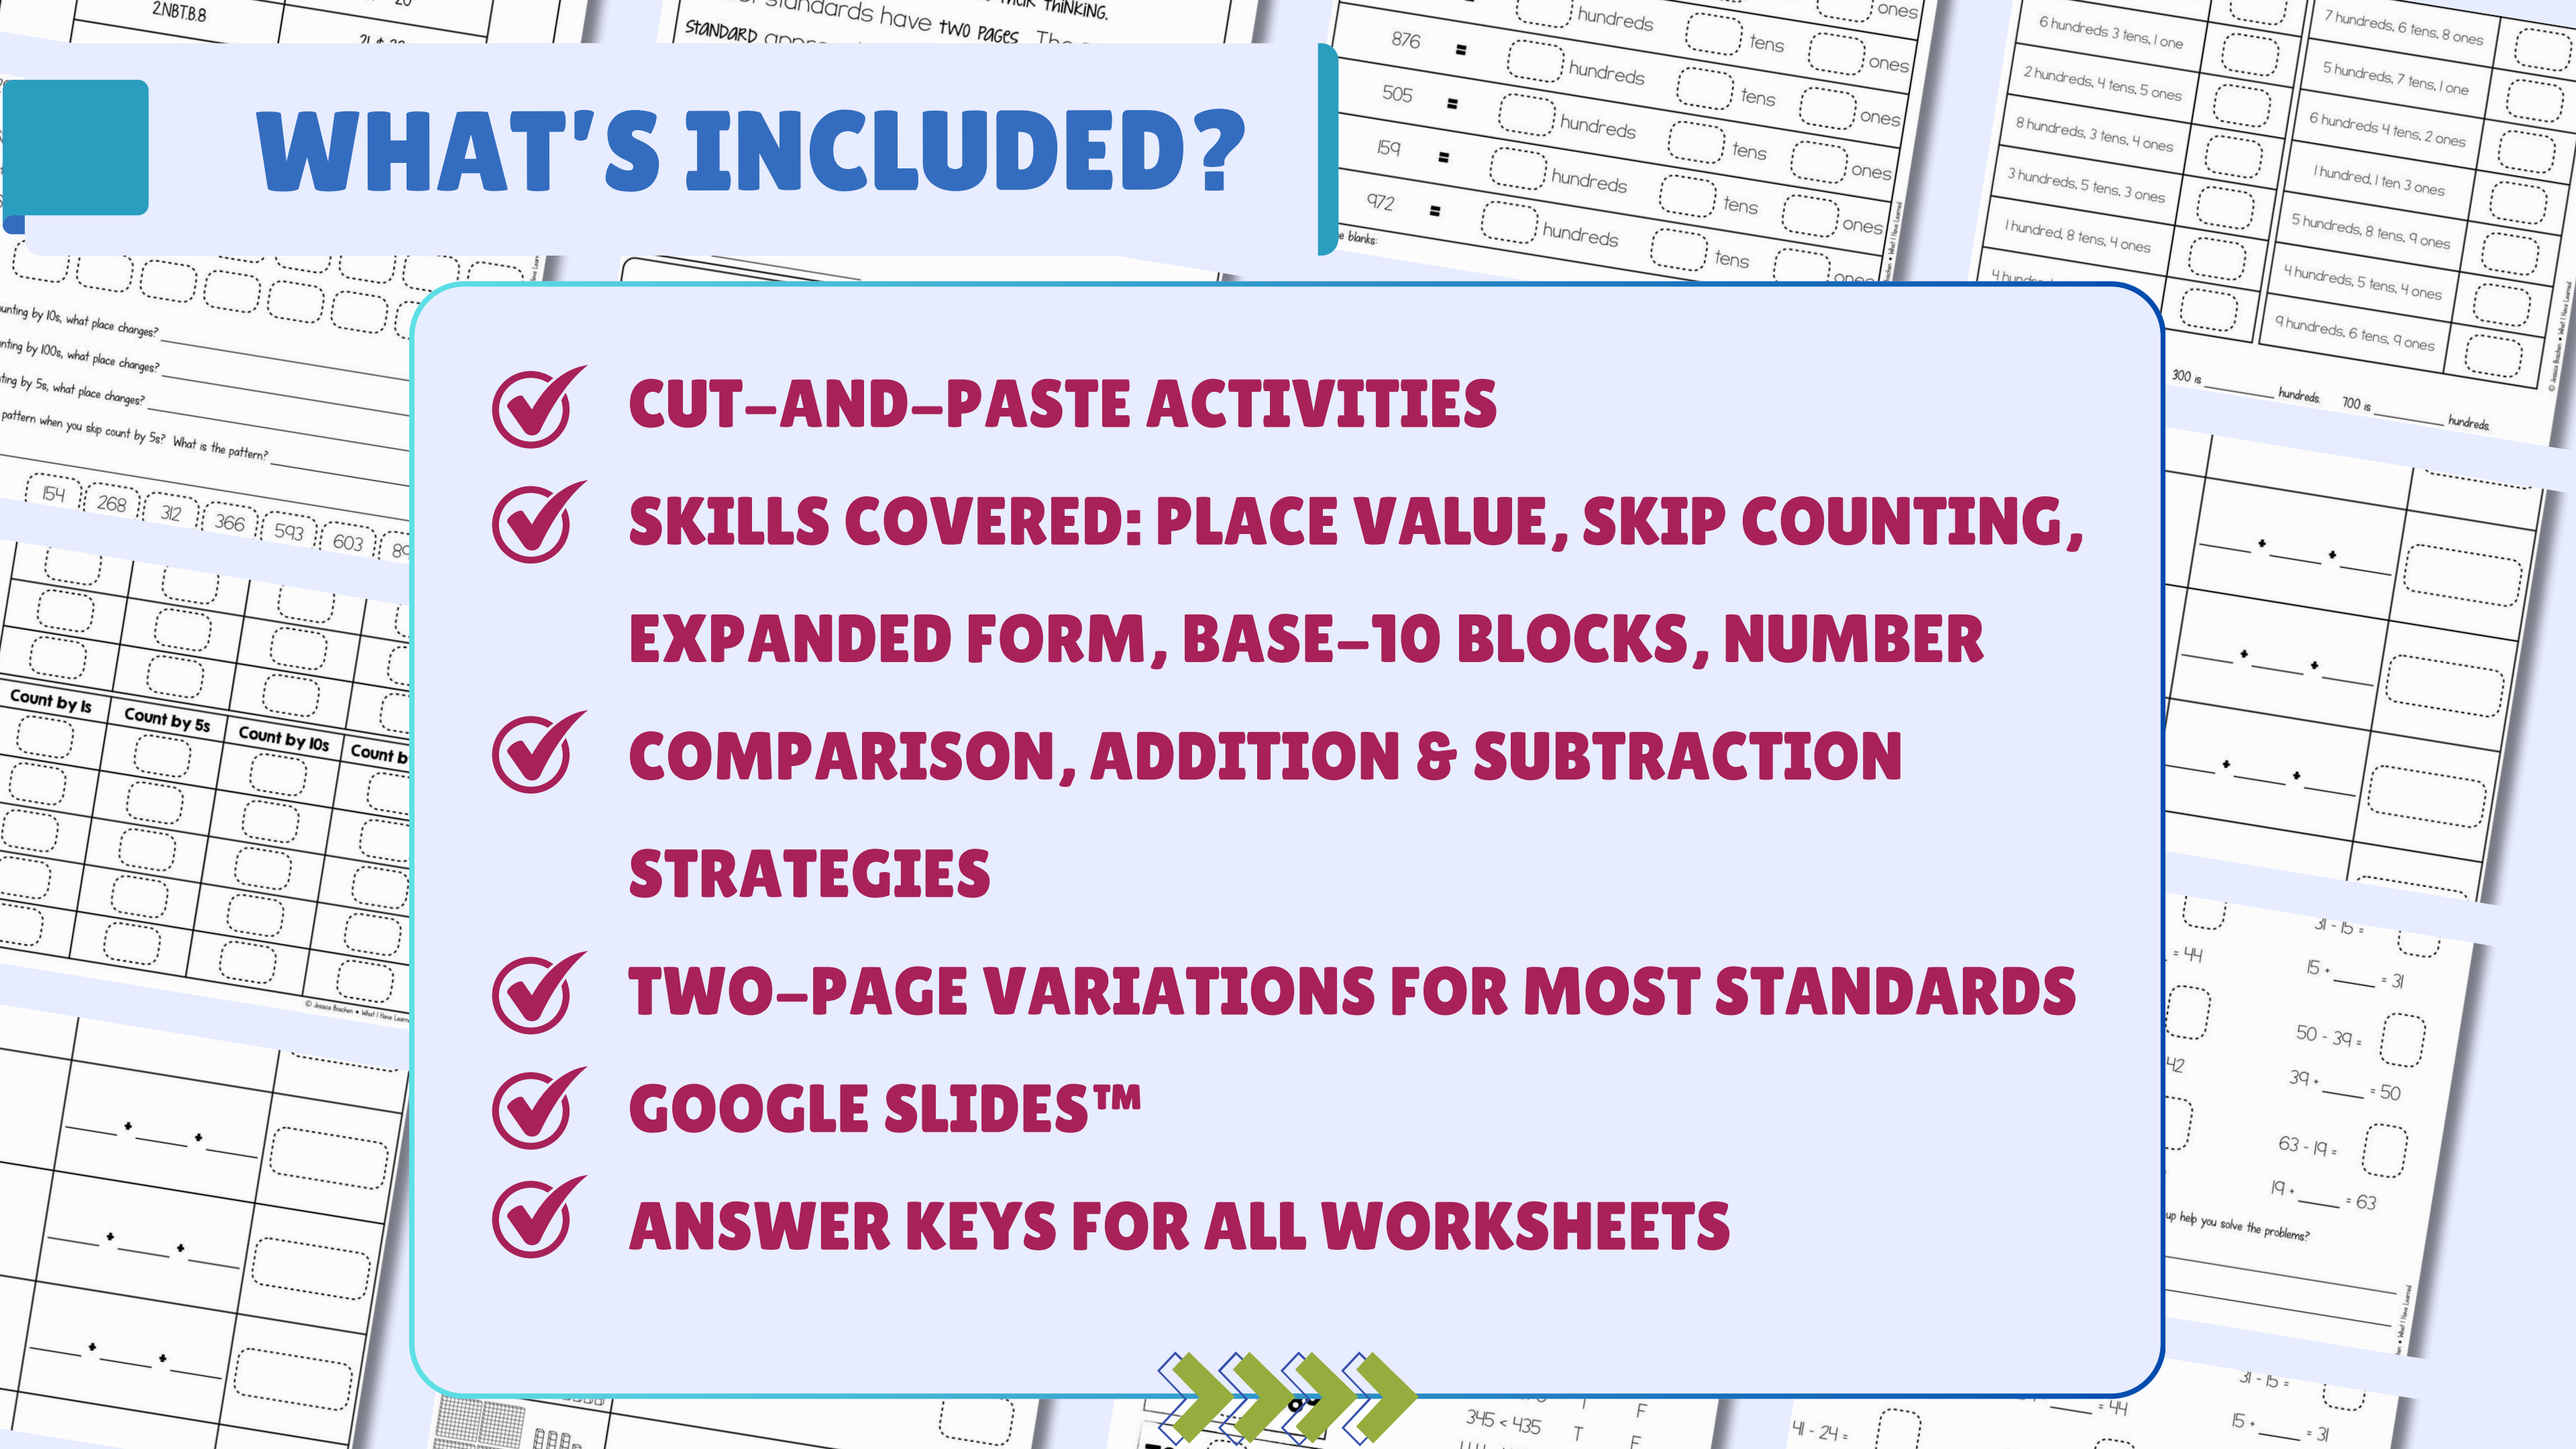

If you have any questions, feel free to email me at jessica@whatihavelearnedteaching.com.

TEACHERS LOVE IT!

Kids and teachers favorites. Love that it includes closer to lesson in writing. One of Louisiana state standards.

Marjorie Lester

I use these as a supplement to Engage NY and also put it in my sub plans which gives them an easy activity that can be quickly introduced and my students can be put to work. I love your cut and paste activities.

Maestra Cafe Teaches

My passion is making learning accessible to all students. I love scaffolding learning. Breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
