Why USE BLENDING CARDS?

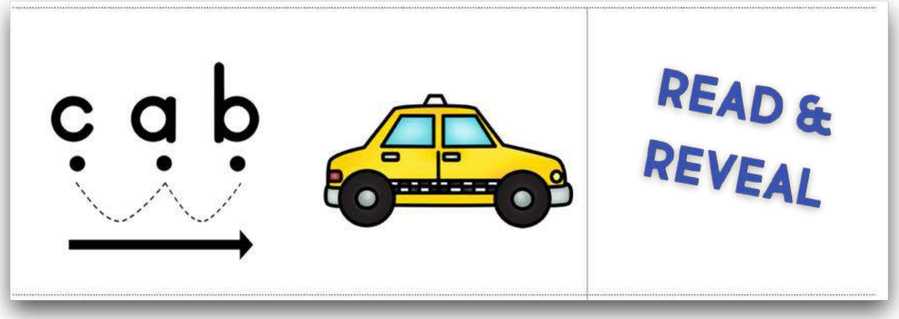

- Students segment, blend, then read the words with blending cues.
- Students practice each sound and each word multiple times.
- There are over 200 words!
- The cards can be used in whole group, small group, or individually.

USE CLIPS TO MAKE IT A FUN CENTER ACTIVITY

PRINT ON COLORED PAPER AND TARGET INSTRUCTION

PHONICS CARDS & IMAGES

Pocket Chart Cards are black and white, so you can print on colored paper. Read / Sound and Reveal are color images so you can laminate them and use them over and over again.

★★★★★ **Extremely satisfied**

This is an incredible product to help students start to learn to read by learning CVC words. I am using it in my Reading Intervention groups. I have already seen a huge change in their ability to read CVC words. It is easy to follow to teach first graders. I love the cute pictures to help connect the words. The boxes help connect the sounds and letters to each word. Thank you for making this incredible product.

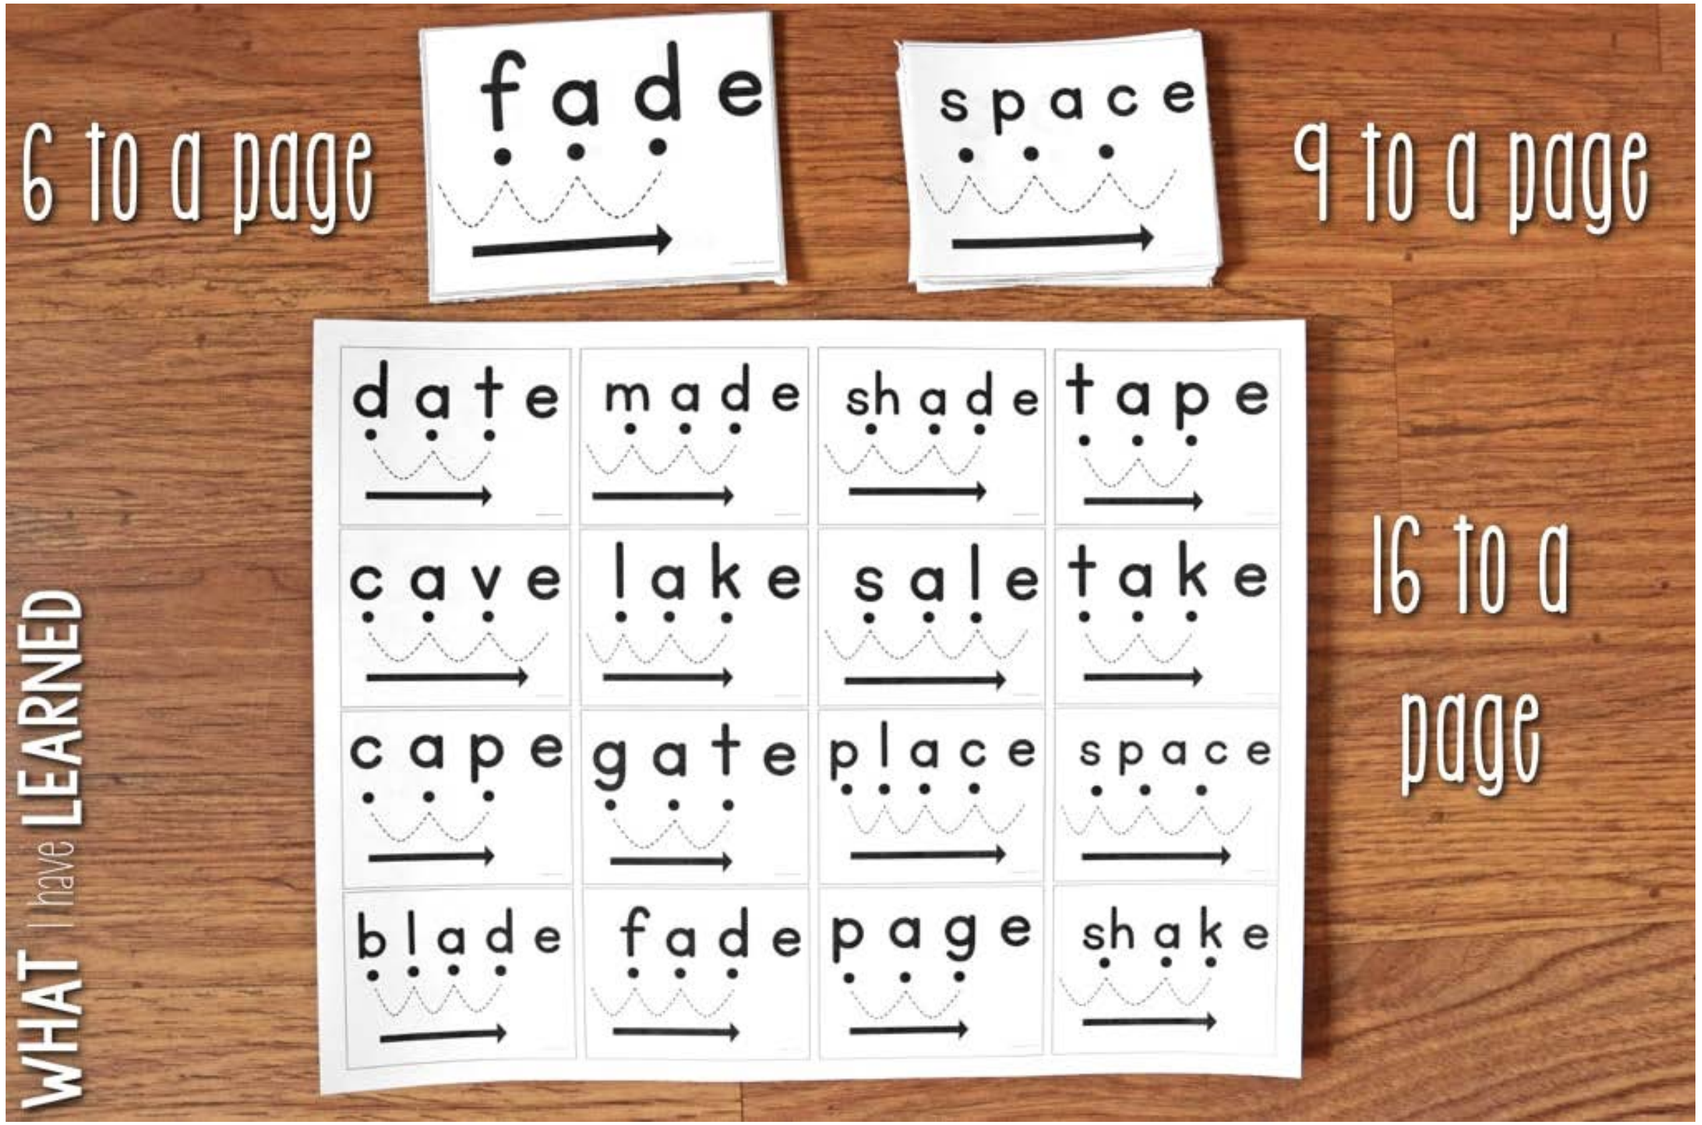

Students used with

1st grade

Easy to PRINT DIFFERENT SIZES

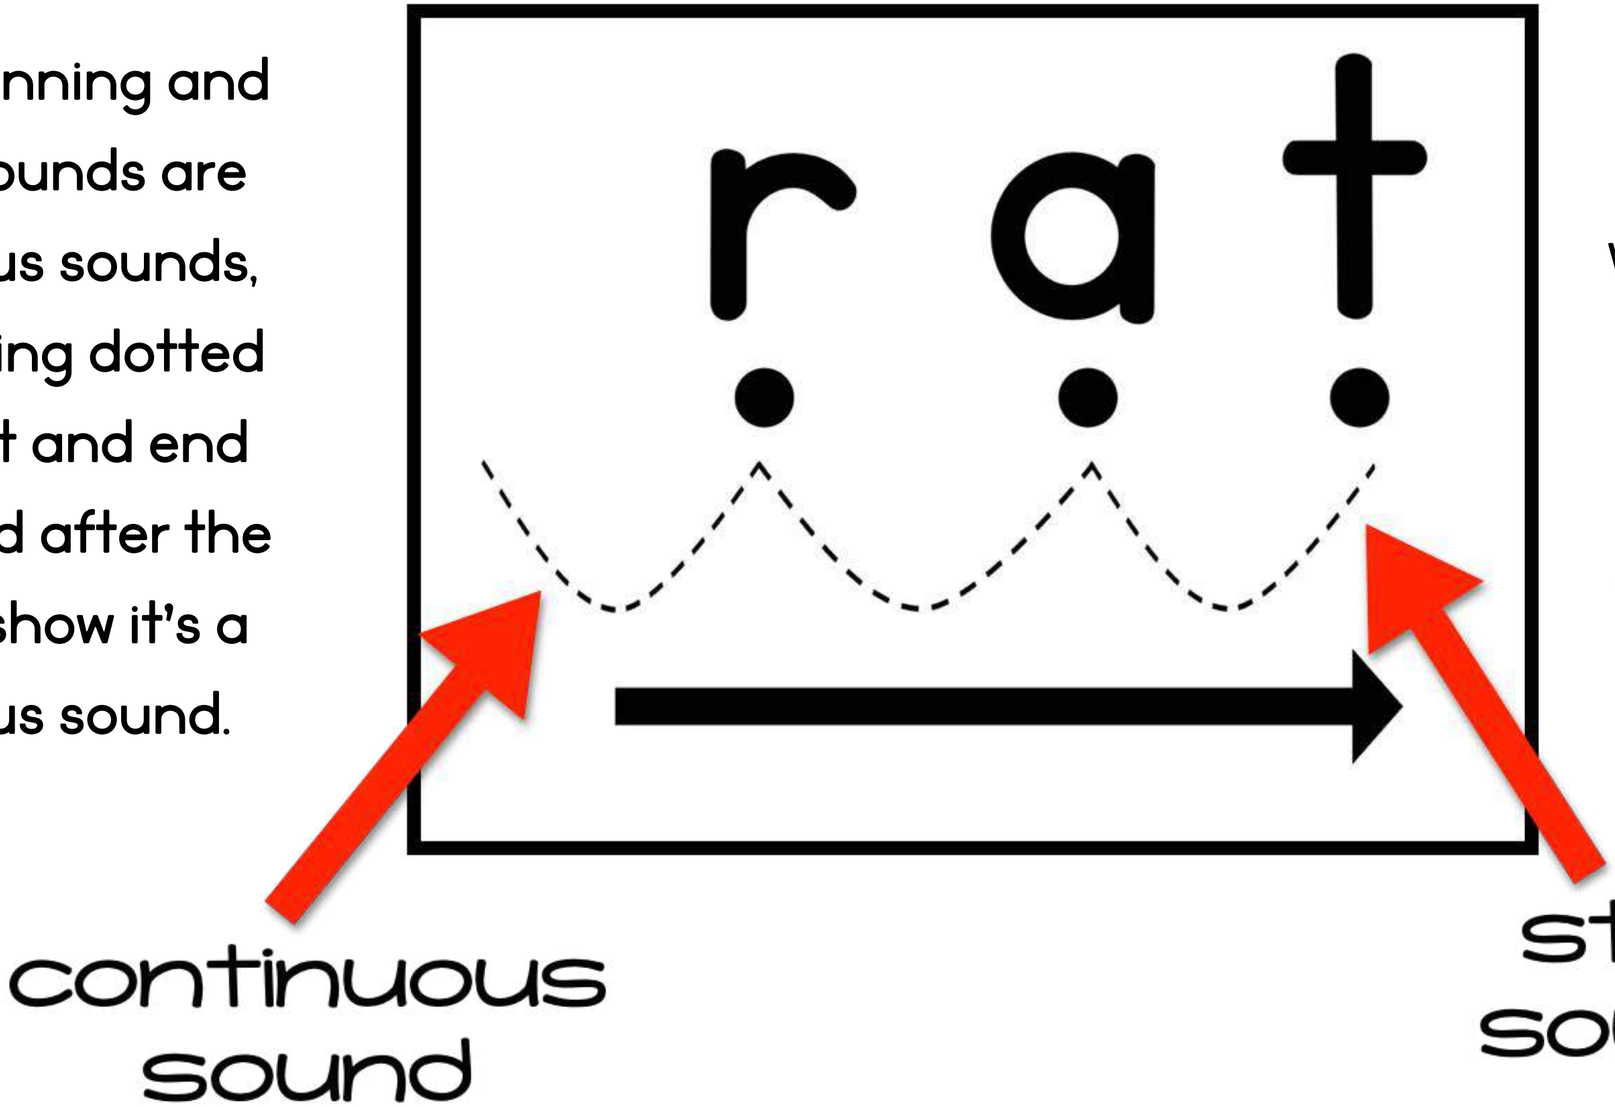

**note image is of the VCE cards

All the blending cards are created full-page to use whole class. Print on card stock or post them on your board to create a hard surface. Laminate for durability. Send home or use in small groups.

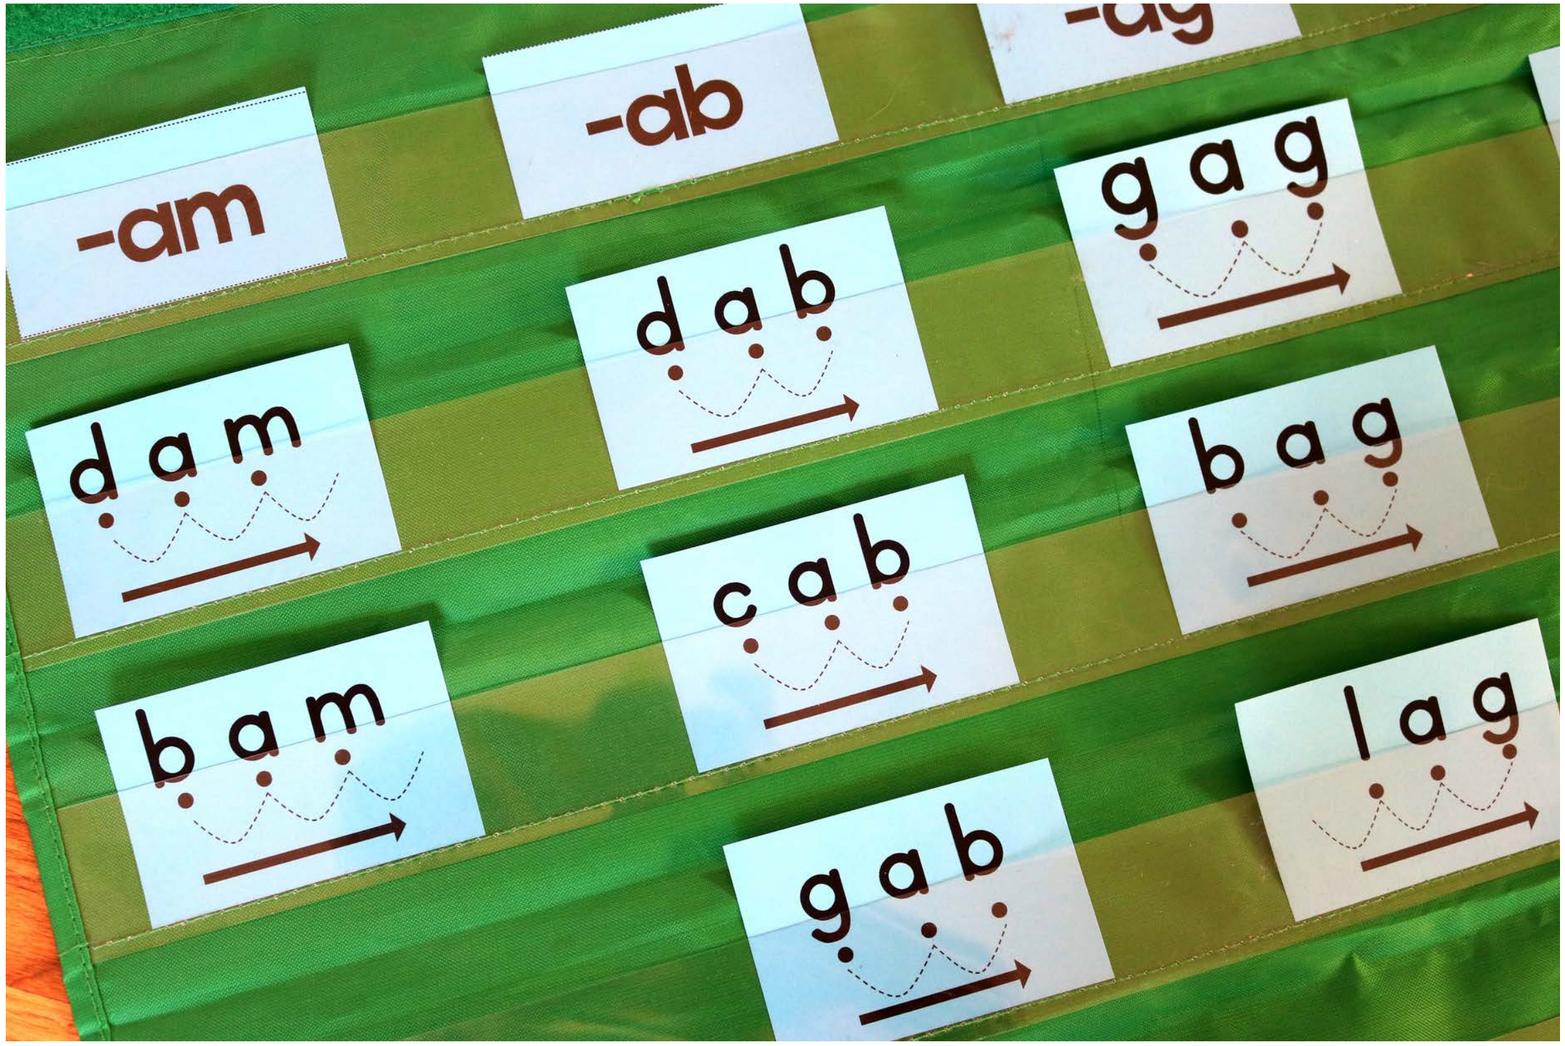

SAY THE SOUNDS, BLEND THE SOUNDS

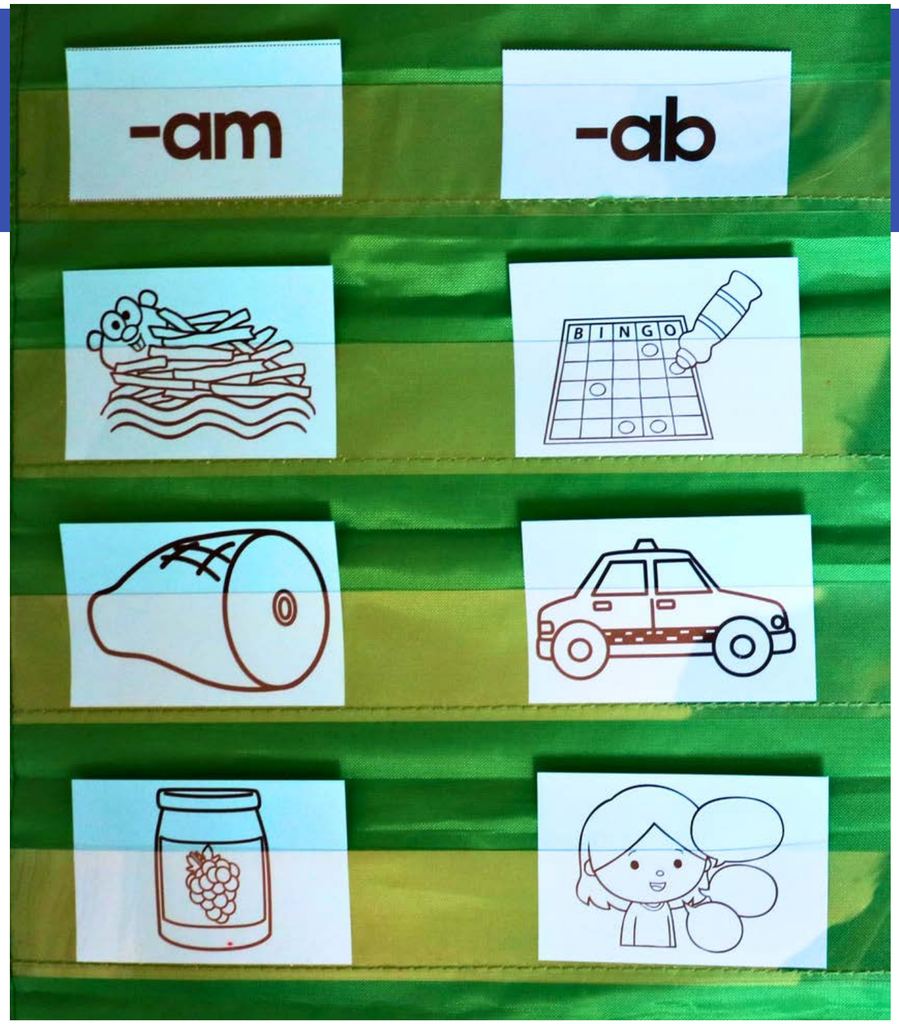

If the beginning and ending sounds are continuous sounds, the blending dotted lines start and end before and after the letter to show it's a continuous sound.

If it's a stop sound, the blending line starts and stops at that sound. When teaching students to blend the sounds, emphasize the continuous flow of the sounds. Stop sounds will be quickly blended with vowel sound next to them.

POCKET CHART SIZE

Pocket Chart Cards are about 2.5" tall and fit most pocket charts. They come with the blending card and a picture card to match. The pictures match our Back-to-Basics Phonics Worksheets.

My passion is making learning accessible to all students. I love scaffolding learning., breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
