TEACHERS LOVE IT!

I love the option of having cut and paste in my stations. This was a great way for the students to review and it was something they could work together on and stay engaged while I worked with small groups.

Michelle S.

I teach in an 8th grade resource room, my students found this engaging and enjoyed something different.

Kirsten C.

My passion is making learning accessible to all students. I love scaffolding learning. Breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
