Fractions Number Puzzles

Jessica Boschen· What I Have Learned

Fractions Number Puzzles

These Fractions Number Puzzles help students match fractions. There are two types of puzzles. One puzzle has the fraction in five forms: word form (two forms: one half and half of), number form, and as a circle and rectangle model. The other type of puzzle has the fraction in three forms: standard word form (one half), number, and one model. This version's puzzles are duplicated for both the circle and rectangle.

Include are pieces for two, three, or four equal shares, including one whole.

<u>To assemble:</u>

Print on colored paper, laminate and cut apart.

<u>How to use:</u>

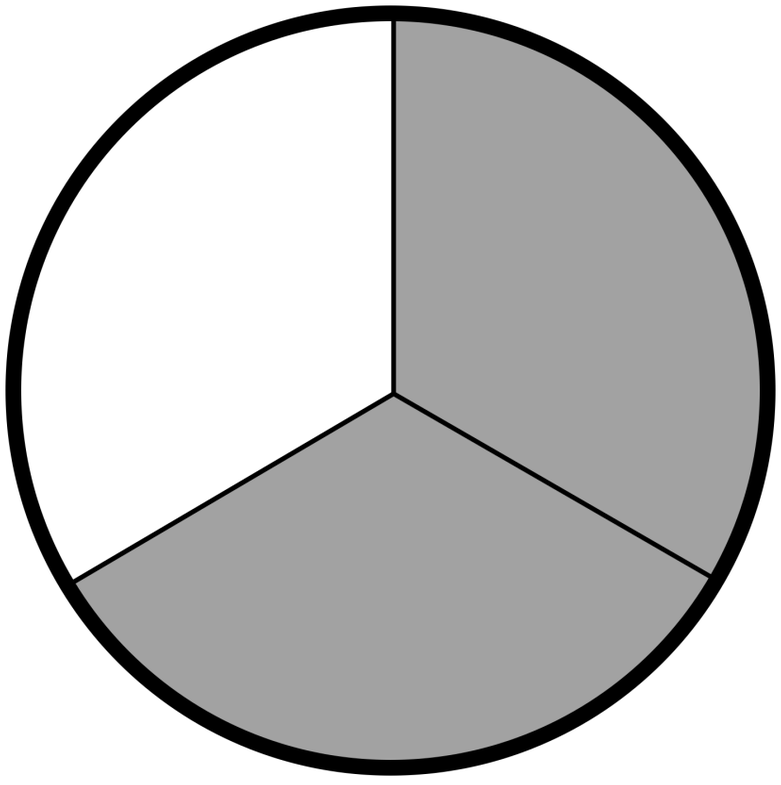

Students can put together all four pieces of the puzzle or only match certain pieces at a time, depending on the form on which you want them to focus.
