EASY TO USE

Students read a short passage about vertebrates and invertebrates.

Then your students will complete a diagram classifying the different types of vertebrates.

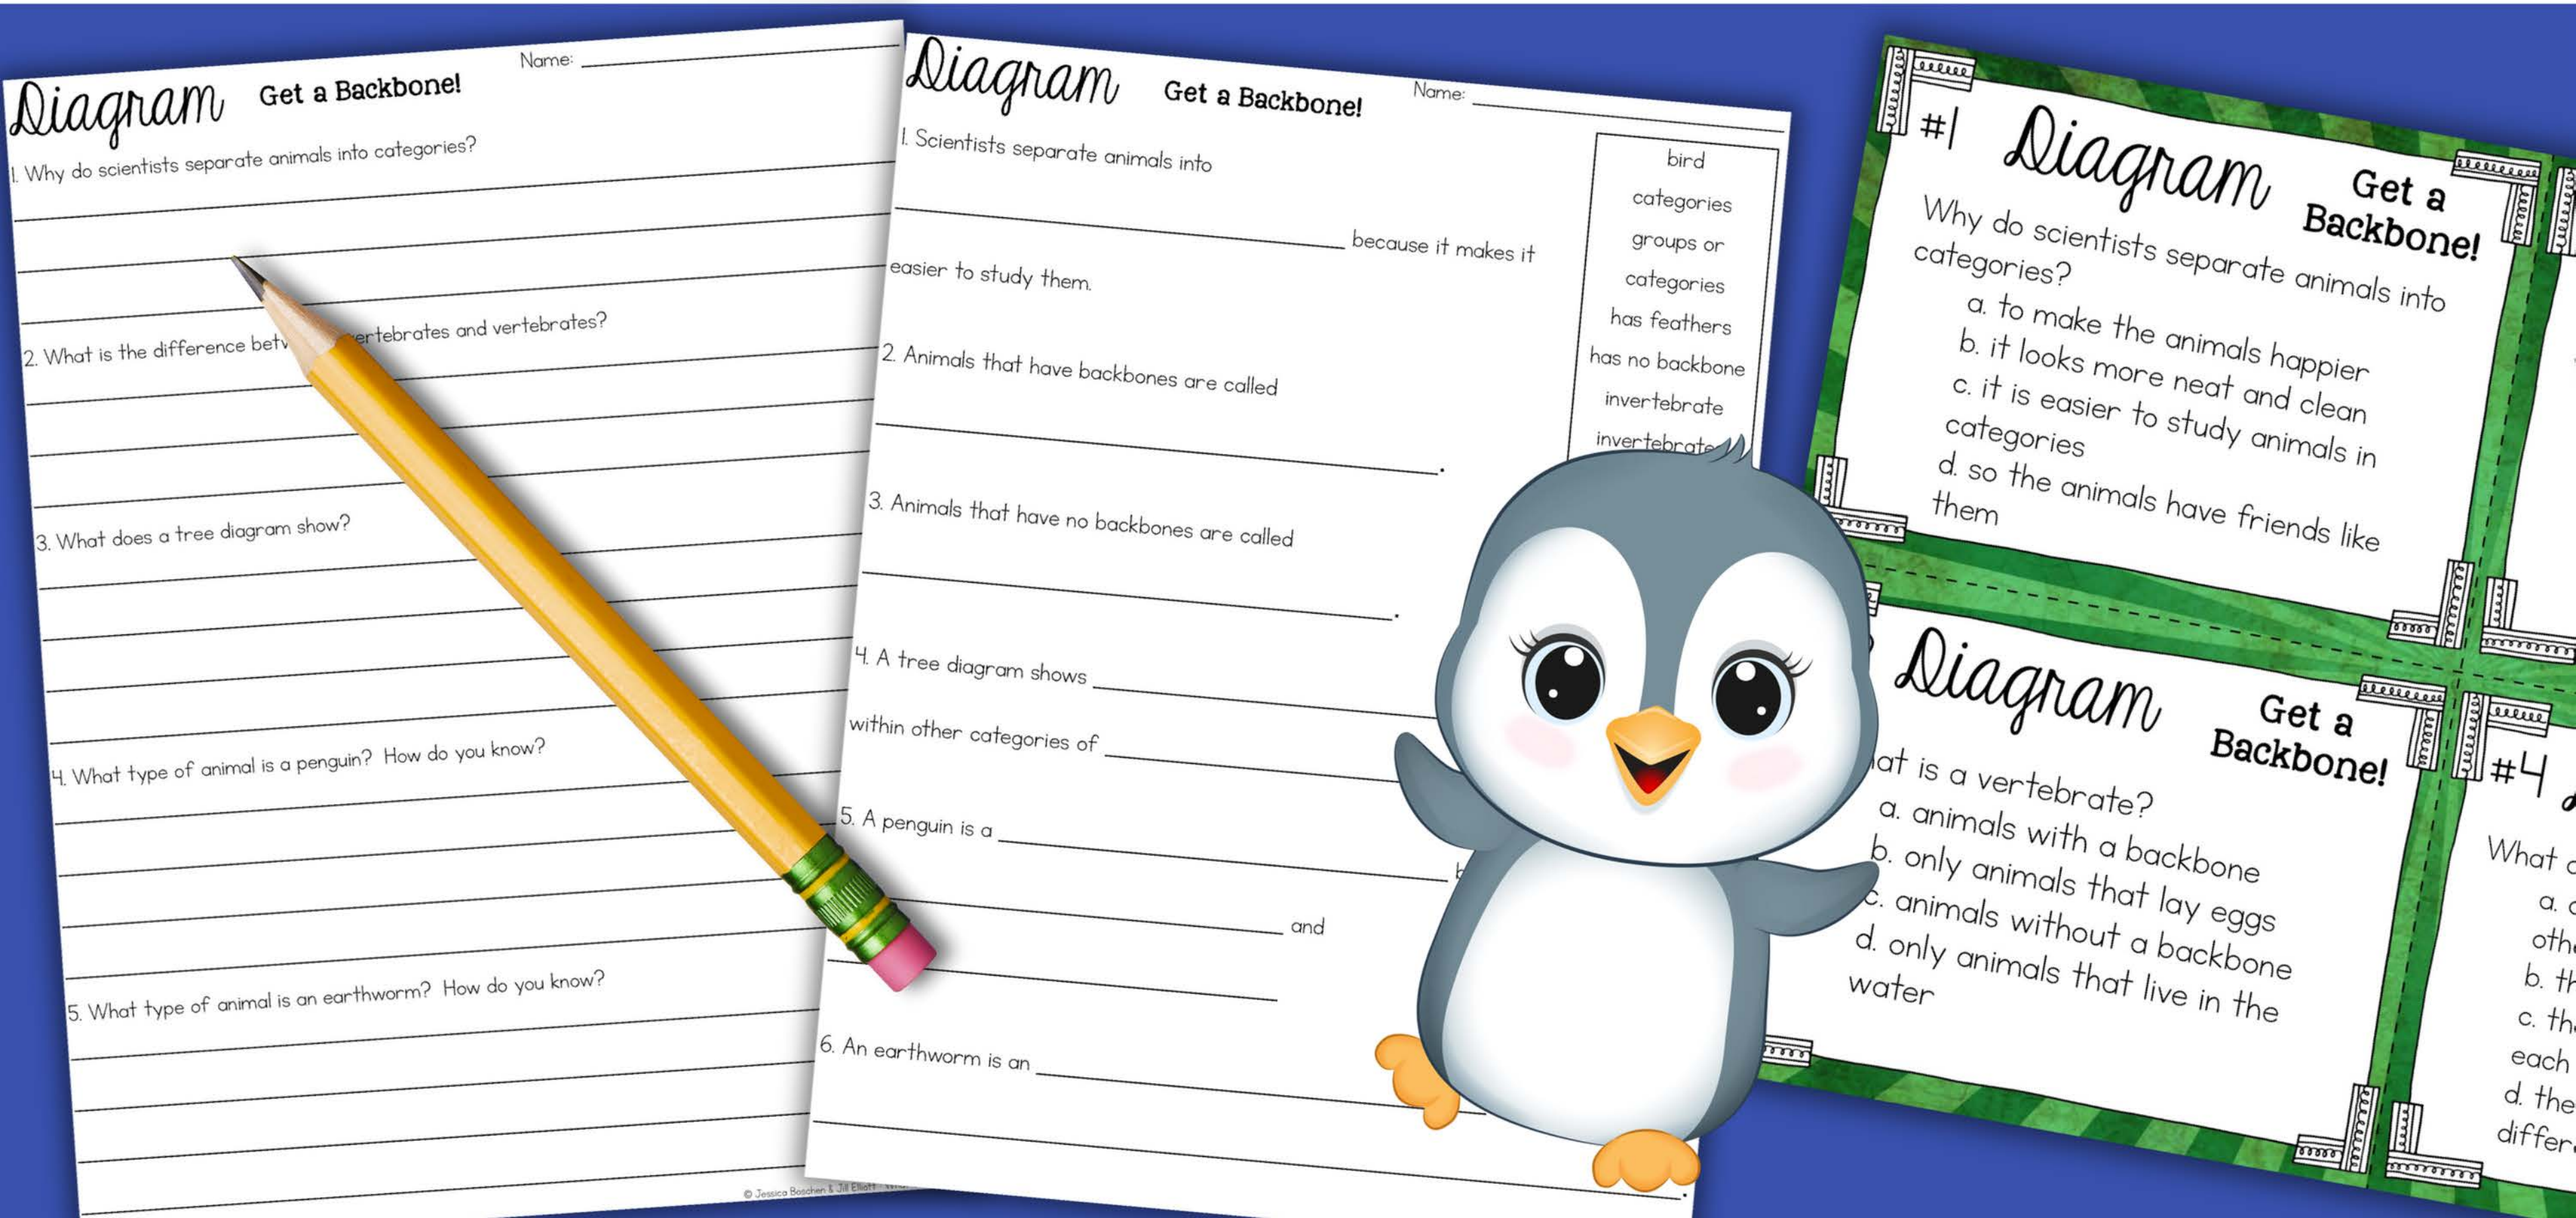

Then lastly they will answer questions about vertebrates and invertebrates.

Classifying Vertebrates Tree Diagram

Teachers love it

I bought this first and then realized there was a whole bundle! So I bought it as well. Looking forward to using this with my 3rd graders!

Thank you so much for creating and sharing this resource. My students greatly enjoyed the reading passages that accompanied this unit leading up to this test. Very age-appropriate and super kid-friendly in presenting the information.

My passion is making learning accessible to all students. I love scaffolding learning., breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
