Teachers love it

I loved using this! I partnered my students and they worked together to complete the activity page to categorize the dinosaurs. I only wish that I had bought this earlier!

I used this resource with my students to teach them about the differences between omnivores, herbivores, and carnivores, specifically relating to dinosaurs. They loved the sorting activity and the use of visuals really helped them to be able to work independently. Great resource!

My passion is making learning accessible to all students. I love scaffolding learning., breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
