Natural Selection Stations

SUGGESTED USES

- ☑ Learning Stations
  Use all eight stations or just a few as learning stations that students complete at their own pace.

- ☑ Science Centers
  Set up a rotation where students visit each center to complete the activities.

- ☑ Whole Class
  Use the activities in a whole class format.

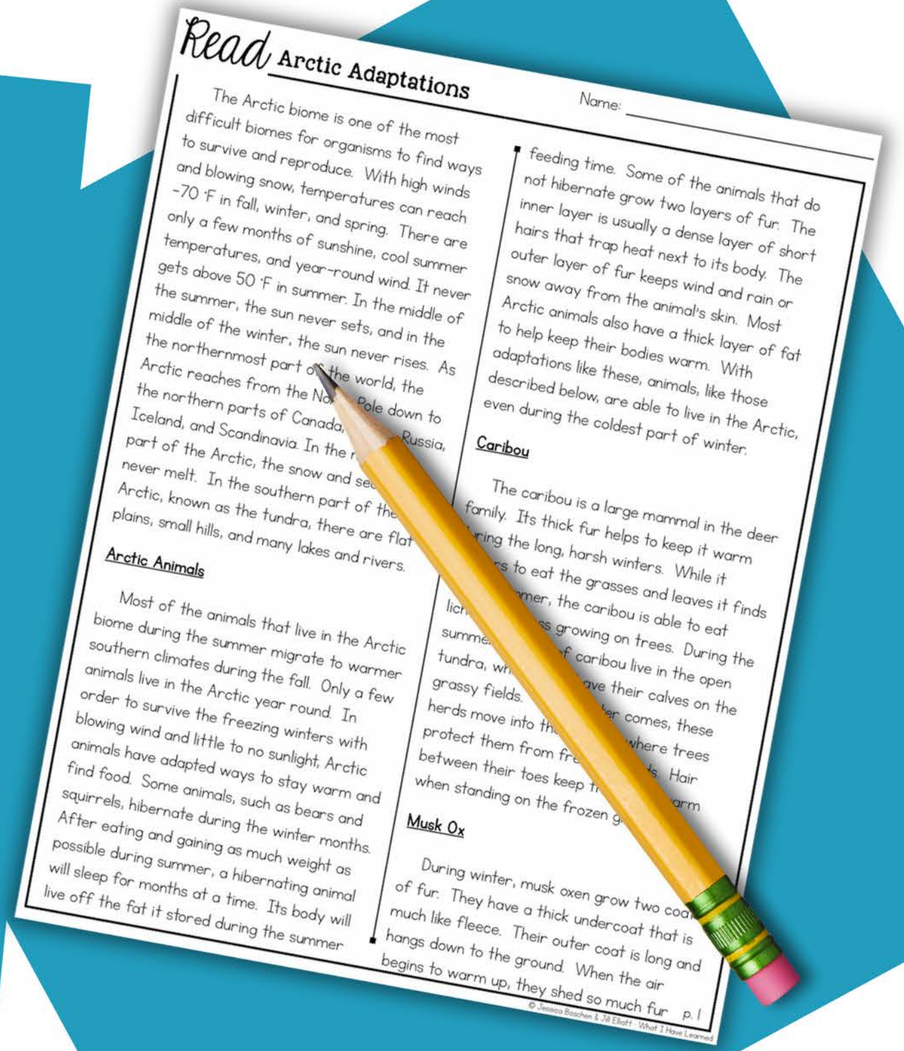

- ☑ Small Group
  Use the activities with a small group who need extra help.

6 READING PASSAGES

6 Reading Passages Provides all scientific background knowledge for each station

Available in two formats

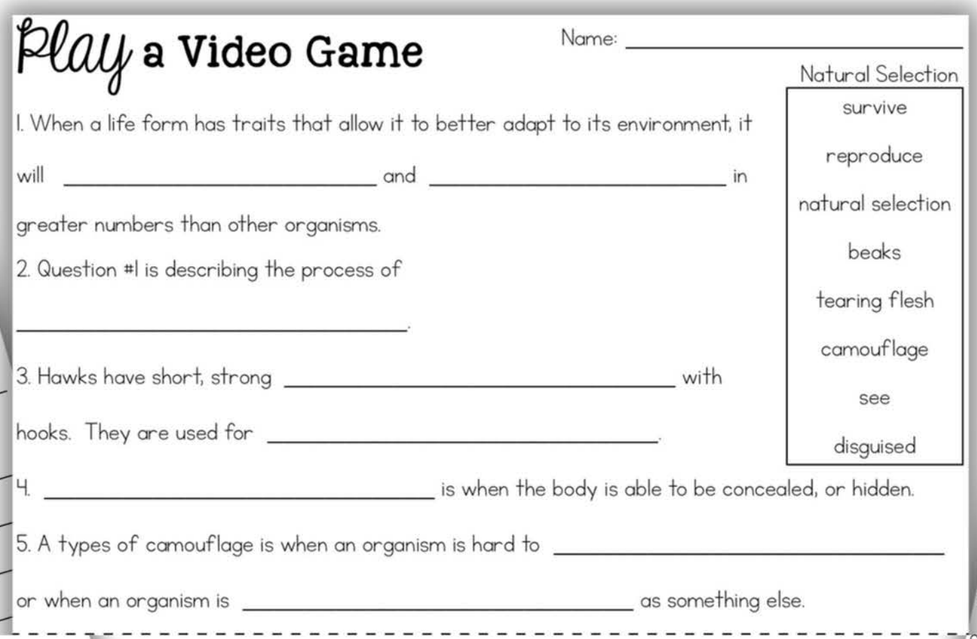

HANDS-ON ACTIVITIES

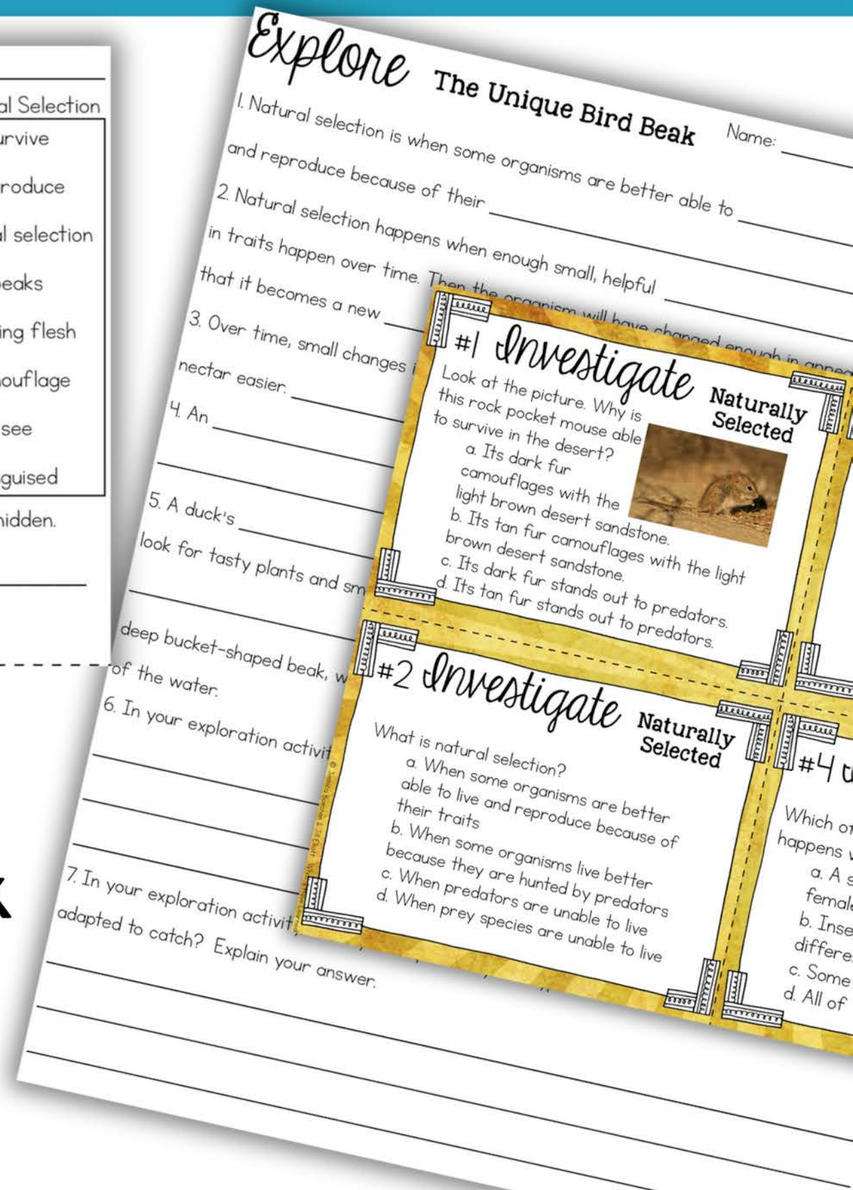

DIFFERENTIATED COMPREHENSION QUESTIONS

Short answer

Fill-in-the-Blank

Multiple Choice

Answer keys provided

VOCABULARY CARDS

natural selection

when some organisms are better able to live and reproduce because of their traits

adaptation

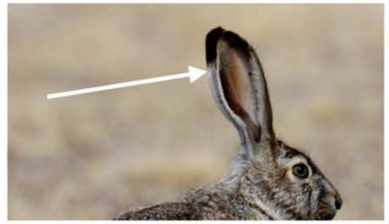

a trait or behavior that helps an organism survive and reproduce

Three-part vocabulary cards with images & Larger cards without images

when some organisms are better able to live and reproduce because of their traits

natural selection

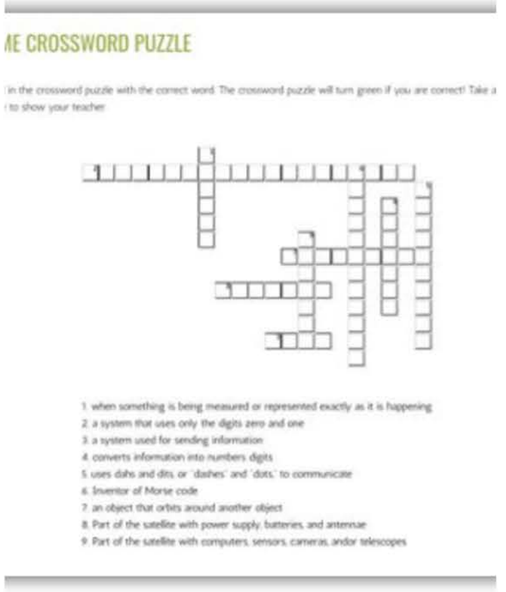

description of a part of an organism's body or behavior

trait

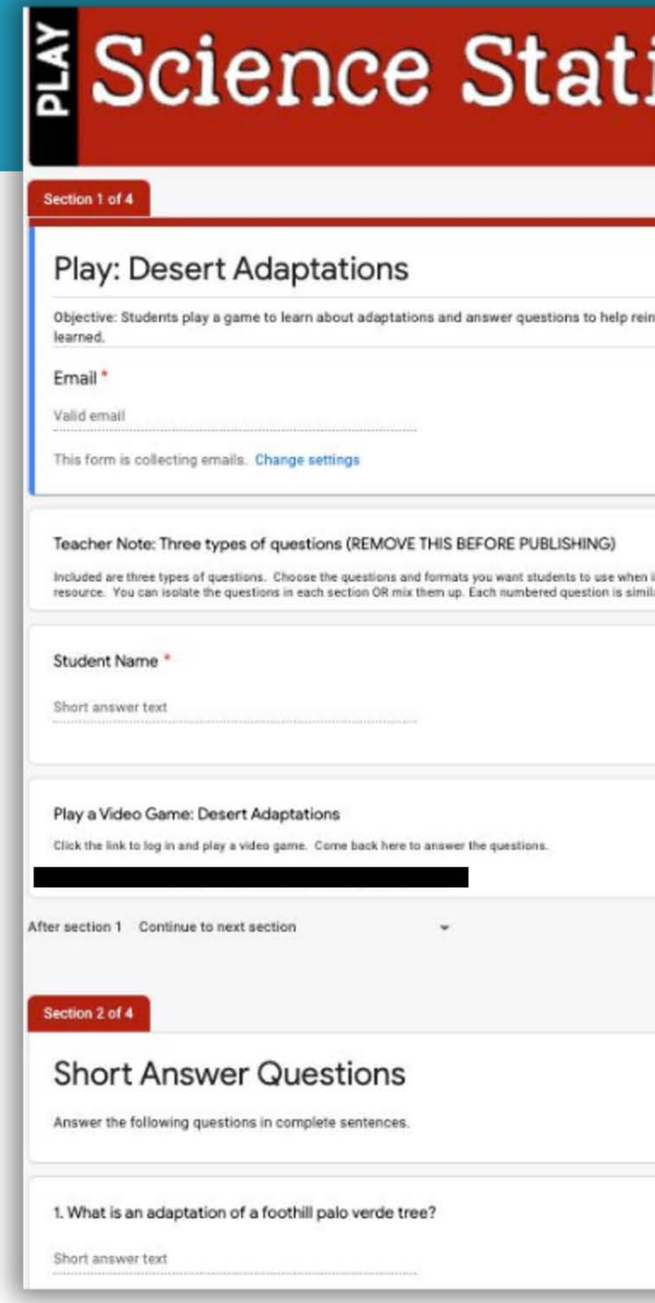

DIGITAL VERSIONS

- ☑ Google Forms and/or Google Slides for every station
- ☑ Videos
- ☑ Video Games
- ☑ Digital Crossword Puzzles & Word Searches

teacher prep

- Choose a topic and activities
- Choose which type of questions students will answer
- Set up the station using the included materials list
- Have students read the passage to build background knowledge (optional)
- Have students complete the stations using the included student directions

Teachers love it

My science curriculum is terrible, but these activities are PERFECT! So easy to implement and my kids love the variety of tasks to learn from.

This was fantastic. There is so much to use in this resource. The students loved all of it. I have no science materials so this covered the topic well. Thank you.

My passion is making learning accessible to all students. I love scaffolding learning., breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
