NF 4 – COMPARE FRACTIONS MODELS

YOU WILL LOVE THIS BECAUSE

Promotes Visual and Abstract Thinking

Students explore fractions using number lines, models, and visuals—bridging concrete representations with symbolic understanding.

Covers All 3rd Grade Fraction Standards

Targets every Number & Operations—Fractions standard with hands-on, standards-aligned activities that build conceptual understanding and skill.

Encourages Hands-On, Student-Centered Learning

Puzzles, visuals, and scaffolded worksheets allow learners to explore, discuss, and deepen understanding independently or in small groups.

TEACHERS LOVE IT!

This resource is exactly what I needed! It's well-organized, easy to use, and saved me so much time in planning. The materials are engaging for students and clearly created with both teachers and learners in mind. I appreciate the attention to detail and the thoughtful design. Highly recommend to any educator looking for quality content.

Ryan H.

Fractions are hard enough for 3rd graders. I set out to find anything engaging that will help my students understand this difficult concept. They love this resource and so do I! I love that I can use this to teach all my standards for fractions. This is a keeper!

My passion is making learning accessible to all students. I love scaffolding learning. Breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
