DIGITAL VERSION

Teacher Notes

Use these Daily Math pages to help student review skills across many standards. We use them in our page protector whiteboards. Each day, a student comes to the document camera, chooses a number, and fills out the Daily Math page. Students can copy from the screen or work ahead.

Included in this packet are four Daily Math sheets:

Number Sense 0 - 99
Number Sense 100 - 1000
Addition & Subtraction
Time & Money

I have included several version for each sheet. The differences between the versions include: a premade number line vs. having students make their own number line and having the "count by 1, 10, 100" written horizontally or vertically.

YOU WILL LOVE THIS BECAUSE

Spiral Review All Year

Consistent daily practice reinforces key number sense and operations skills.

Built-In Differentiation

Multiple versions allow teachers to adjust number lines and counting formats for student needs.

Print-and-Go + Digital Options

No-prep printables and Google Slides make it simple to teach anywhere—whole group, centers, or homework.

TEACHERS LOVE IT!

This is exactly what I was looking for. I am glad I came across this resource. I recommend getting this product to use in your classroom.

Meredith S.

This resource was excellent to use all school year. At the beginning of the year students lacked number sense and this really helped them. This gave them structure as we used it every day at the same time. Students learned place value and number sense!

Angel Usry

My passion is making learning accessible to all students. I love scaffolding learning, breaking down the concepts and building them up so that students can see the connections. I love figuring out the small components that build up to the big ideas and helping students see it all.
